TDT4200 - PS0 Theory Questons - Nicolai H. Brand

1. What is the purpose of a Makefile? Automate the process of compiling.

2. What is a pointer in C? A variable that points to some memory address.

3. What does the -O3 flag do when compiling C code? Enables optimization. O3 is the most aggressive optimization level.

4. How can you pass a value by reference to a function in C? Send in a pointer to that value.
